

# CI/CD

UDAPEOPLE DELIVER SOFTWARE FASTER AND SAVE COST

# WHY CI/CD

- Manual processes are inherently error-prone
- A missed step during a testing phase can turn into a big problem
- Continuous integration and continuous delivery (CI/CD) help us bring better software to market faster, work more effectively, and reduce risk

# CI/CD PIPELINE

CI/CD pipelines are a series of steps that must be completed to deliver a new software release

# CONTINUES DELIVERY

- Reduce code conflicts
- Faster code merge
- Improves app quality
- Faster and more frequent production deployments
- Automated rollbacks in case of failure
- Quick release of features into the hands of end-users safely

# BENEFITS TO UDAPEOPLE

ACTION	VALUE
Release features more quickly	Increase revenue
Less time to market	Increase revenue
Less human error	Cost avoidance
Faster deployments	Increase revenue
Automated rollback production to working state	Protect revenue
